- Articulation Agreement with HFC

PERSONAL PROJECTS

Yelp Camp
- This a full stack application built on a MongoDB/Node/Express stack, utilizing RESTful architecture with Bootstrap 4 CSS framework for styling.
- The app performs CRUD operations for users, the campground and the comments. These pieces are referenced within the database through various associations.
- Actionable commands are displayed dynamically on the site (edit/delete) for campground and comments, depending on a user's authorization/ownership.
- User authorization and authentication in place for various routes, utilizing Passport.js and related submodules.
- Flash messages handle error and success messages to provide the visitor with feedback and improve UX.
- Much of the code has been modularized into separate pieces, including routes, middleware (session authentication), and database models.

Personal Website
- Responsive personal website that shows my Portfolio, Skills. and Contact information utilizing HTML5, CSS3, Javascript.

WORK EXPERIENCE
